Reasons why we are apposed to
Transrail Operating at the Olin
Chemical site in Wilmington, Ma.

FI-2136

I'm writing to beg you not to allow a
trash transfer station in our back yard.
Thousands of people in Woburn will be
hurt by the smell, noise, pollution, and
the horrible traffic congestion the
Transrail will bring. Our streets
are congested now and it is not
possible to handle 400 trucks a day
passing our schools, senior centers
and our homes.

Woburn has had chemical companies
polluting our water wells for years
causing many children to die from
Cancer and Leukemia. Also many birth
defects. One of them was my grandson.
The pollution will effect our health and
our lives. Think of what it would do
to the value of our real estate.

Woburn is a Superfund site and we
have had enough contamination over

seeping into water and the air we
breathe. We have had enough.

Please help us by not permitting
Trans rail to operate at Olin chemical
site in Wilmington, Ma.

I'm counting on you to help us drink
a clean glass of water and breathe fresh
air.

Finance Docket # 34797

Very Sincerely,

Conchetta Leonardis
