Re: Docket No. FD 30186

Dear Mr. Blodgett,

This isn't just about one company trashing four states – Montana, Idaho, Oregon, and Washington – it's about GLOBAL WARMING! China needs to solve its own energy requirements without our help in burning millions and millions of tons of fossil fuels in the form of coal. The idea that one company will make huge profits by creating untold environmental damage locally, nationally, and globally is obscene. Please do not let the Tongue River Railroad expand its lines to facilitate this travesty. Corporations need to be reined in because they will not control their own greed without government regulation.

President Obama says he wants to address global warming in his second term. Let that start here and now with your assistance and guidance.

Most Sincerely,

Dana D. Heald
