September 20, 2008

I am writing because I am opposed to the proposed acquisition of the EJ&E railway by the Canadian National Railway. The population study did not cover enough years. Blocking rail crossings can lead to medical emergencies that will endanger lives. Traffic in the town north of the crossings will be over congested. Hazard Waste spills have not been adequately addressed. These are just some of the reasons I find that this proposal should not go through.

Sincerely,

William Cidell
