Transcript:

I am objecting to the purchase of the EJ&E line by Canadian National. We do not need another unregulated corporation wielding its power on the backs of the people, and then asking the local taxpayers to fit the bill for any mitigations that will be forthcoming. There are no pluses for this community along the line, it is simply going to be a dangerous situation. I strongly object and I will be supporting the passage of HR 6707 into law, and writing my congressman.
