Transcript:

I am opposed to the CN Railroads proposed acquisition of the EJ&E Railroad. This is STB Finance Docket No. 35087. I am primarily concerned about the impact on my home value as well as the ability to have emergency medical response quick enough should we have a medical emergency in our home. And I understand that the length of these trains could seriously negatively affect that response time. And I am a Type 1 diabetic and do need to have that quick response. Please give this serious thought and do not allow this acquisition to go through.
