How will CN's proposed acquisition of the EJ&E impact you?

The proposed acquisition will have a very detrimental effect on the quality of life in LAKE ZURICH. The noise, pollution and congestion will create a ribbon in the middle of the community of LAKE ZURICH that people will not want to live or be around. Consequently, there will be a gradual decay around these railroad tracks that spreads gradually throughout the community. Eventually the entire community will become known as a train town - Keep away. The numerous trains through LAKE ZURICH will begin to split communities into decay.
