Transcript:

I am calling about my concern. All of our homes are on well and septic. This railroad is less than a 1/2 mile from my home and many others. We moved to this area for peace and quiet and pay exorbant amount of taxes. If there was a spill, we would, all of our wells would be contaminated. The hazardous waste will increase the odds. I'm also very, very concerned about our safety, it would cut off our immediate access to ambulances and fire trucks, fires, they would have to go out on a much further roadto get to our homes. This is very dangerous. I totally oppose it and can not understand why this is even happening. The amount of money that they offered the United States to subsidize this is minimal. We can not let this go through. We have to put a stop to this to save our environment and for the safety of our citizens. Thank you
