Case AB 167-1189-X and related cases
May 2, 2009

FI-17768

Jersey City has small parks that serve a growing population. We need more open space, especially habitat-oriented space. We need greenways that walkers and bicyclists can use for long distances without grappling with the heavy motor vehicle traffic of our City streets. We depend on mass transit for commuting to work and activities, and to cut down on the use of motor vehicles. All these public uses will be served by the preservation of the Harsimus Branch in Downtown Jersey City. Further, as an attendee at an annual event sponsored by a neighborhood association, I can attest to the value of our parks in bringing neighbors together. They are our public forums. By my signature below, I am requesting that the Surface Transportation Board authorize an Environmental Impact Statement for the Harsimus Branch, an transportation, open space, and historic resource in Hudson County. An EIS will help to insure that decision-makers have the best possible information available to them as decisions are made about the impacts of rail abandonment, immediate and longer term, direct and indirect.
