Message: Just the proposal has negatively affected our property value. We are needing to sell an appealing country property and will sustain substantial loss as a result of this action. The proposed will hamper interest in a quiet country setting in the future. In addition, the production of some of the nations prime farm land will be removed from service, for what? If this is privately secured land, please do not allow abuse of the eminent domain privilege of the government for private gain. The entity desiring the land is free to approach private parties and acquire the land like any other citizen. They should not have government backing to bypass the process of capitalism in its purest form.

Yes, I am directly affected by this proposal, and negatively so. Please, register my opposition.
