Transcript:

The increase in train traffic is absolutely unacceptable around here. No one will be able to get through. We will be late for everything. The kids that are near the railroad have that much more chance of an injury or death, so this is ridiculous. We are not for this one bit. The homeowner's value goes down with all the trains going by it. We are not right next to it, but I feel sorry for all the people who are right next to it right now. We are actually saying no to the Canadian National Railways acquisition. I don't know if it is needed, but it is STB Finance Document No. 35087. That is what we are calling for.
