

To Surface Transportation Board,

We are very disturbed that this Plan has a possibility to go through. It would affect miles of Suburbs with the same Problem. TOO MUCH TRAFFIC! TOO MUCH NOISE! Failure for buses and emergency vehicles to reach their destinations.

Tax Payers and our State are spending large amounts of money to relieve traffic on main roads and highways by widening our highways. This would be a big step back for all of us and these areas. We thought these tracks were going to be used for commuters to link with other rails. Can your decision be about the People for once and not about money or business??

Sincerely,

Paula Minardi
