Transcript:

I was calling regarding STB Finance Docket No. 35087. I wanted to let you know I have been to several meetings regarding this issue. I am quite concerned about the lack of the infrastructure necessary for this traffic that has been proposed and the fact that it really is going to have a lot of affects on commuting and environmental issues within the town. I definitely want to object to what is going on here with Canadian National not supporting the infrastructure improvements necessary to minimize the environmental impact in the area. If they are not willing to pay the freight to move the freight, it would seem like they shouldn't be allowed to come through the area. Thank you.
