Phillis Johnson-Ball.
Surface Transportation Board.
Finance Docket NO. 34797

Patricia & Kevin Kane
8 Henry Ave
Woburn, MA 01801
April 24, 2006

To Whom this may concern.

This is the second letter we have sent in opposition of a "trask" transfer station "at the contaminated site of the Clin Mill Chemical in Wilmington, Ma.

Why this keeps coming up again when the site has just been made of a Superfund site, and drinking wells in that area have been closed. Enough is enough!! What does it take to give areas like ours a break??

Our family has been personally effected when our son Kevin contracted leukemia at the age of 2 1/2 from drinking contaminated water in Woburn, Ma. from the now Jamies wells G+H superfund site.

Two elementary schools, a daycare center and large senior housing complex are located in North Woburn on Rt. 38 and the high number of truck activity will have an enornomes impact on an already overburdened roadway.

Sincerely,
Kevin & Patricia Kane
