To Surface Transportation Board,

We are totally against New England
Transsrail's proposal to construct a solid
waste facility in the Wilmington, Holiston
area.

This property has just been named to
the Environmental Protection Agency's
national priority list, to consider using
it for a transfer station is absolutely
unacceptable.

We in this area have been subjected to
contaminated, water, air and Leukemia
clusters.

The traffic on Rt 38 in No. Waltham already
is a problem, with 3 apartment houses,
2 Elementary schools, a day care center and a
Senior housing complex all in close prox-
imity.

Our area has paid it's dues, this project
should be stopped immediately.
