Transcript:

I find it very inconvenient and also dangerous for the amount of rail traffic that goes by on 182nd Street there because emergency vehicles cannot get through with the number of freight trains that go through (I believe there are 22 a day). I am on oxygen, I am not that healthy, and do rely on the paramedics occasionally, and it is difficult to come through and also for fire. I definitely would like that shut down or closed down to a more reasonable number. Thank you very much. If you need to contact me my number is 708-895-0023.
