

My name is John Walsh. I am a retired farmer. I am 58 years old.

I am living about a mile from the proposed R.R. track. This new track will deval my property. The R.R. track will cause a lot of problem by causing the traffic to have to stop for the trains. This will cause a traffic hazard on the county Rds. It also will cause an environmental impact on the surrounding countryside. The dust these train cars will cause a health problem with the fresh air. This is a older community with a lot of elderly people. I am also concerned about the Quik creek. It may be caused to overflow its banks due to the R.R. building grade level crossings. I just feel it would be dangerous to drive the roads due to R.R.'s and Quary. I would appreciate not letting Volcan having the permits to build this track.

Respectfully yours
John Walsh
