

May 30, 2016

Dear Sir,

I have been following the articles regarding the proposed railroad thru Wisconsin, Illinois and Indiana and I am very much against it. This land in Janesville, Wisconsin is prime farm land and once the railroad went thru, it could never be farmed again.

Mr Patton, who was on software and whose family did not to farm in Iowa does not mean my neighbors children and grandchildren do not want to farm. How can people

who do not live here but
in Washington, Dc say we
need a railroad right thru
this wonderful land.

I know this letter won't
do any good because the
little person doesn't count any-
more only those with too
much money. But I wanted
you to know my neighbors,
especially those where the
tracks will go right thru
their land, are very upset.

Please think about where
the food for people and their
animals come from — not
from stores!

Please think about this
and listen to people who
do farm and who want
to continue to farm

Sincerely
Margaret B. Henke
