Should the CN proposal go forward as requested.
What is the projection for fatalities annually
due to ^{respective increase in} this train traffic through the densely
populated corridor ~~and~~ car train, pedestrian
collisions? What is The accumulated
total through all affected communities
for human fatalities on an annual basis?

If you do not know the answer to this question
before you decide on this proposal
how can you make a decision on this
potentially lethal plan?

Why should the public not know this statistic?

YOUR INPUT IS IMPORTANT!
