Transcript:

I'm calling today because I would like to see less trains in the area. A personal experience that I witnessed was my girlfriend was having a heart attack and the ambulance could not get through to Ingall's Hospital in Harvey because of the trains and were blocking the streets and then she had to be rerouted to a hospital much further away in Blue Island because that was the only way that the ambulance could get around the trains to get her to the hospital. So that was a very crucial situation and they had radioed the police and the trains, but they couldn't get the tracks cleared to get through. So, this is one of the reasons why we need less train traffic in South Holland and Riverdale and Harvey because it keeps people from getting to the hospital in an emergency. Thank you
