June 6TH 2016

Lets keep This rather simple:

We have at any given time 15-20 Honeybee hives on our property. — Organic orchard, organic garden, and wildlife area —

GLB proposes a 250 foot industrial corridor 1000+ feet from our property... Oil tank cars, coal cars, chemical cars, etc. Pipelines / utilities etc. All of the negative aspects of a heavy industrial zone.

We have lived here 29+ years trying to make this property the cleanest, healthiest, most environmentally balanced property possible.

If you were to allow this rail corridor we would lose property value, environmental quality, ^{and} short almost everything we've invested over the last 29 years. Everybody and every living thing loses

... for what?

Coal is a dying industry

Oil is a dying industry

Industrial pollution is the past NOT the future.

Please help us defend the good, clean, peaceful life we have here!

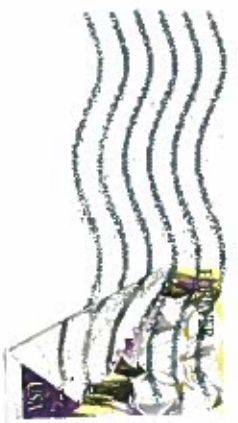

Sincerely

William Vose
