Subject Abandonment Exemption Stockton Terminal and Eastern
Railroad Linden STB041021A

Christa,

I have reviewed the record search from the Central California Information Center submitted by your office for the Stockton Terminal & Eastern Railroad abandonment project in Linden, California and I also consulted with Clarence, who is now working for the California State Library. According to him, he was waiting for the record search to determine the need for survey at the project location. According to the record search:

"The Stockton Terminal and Eastern Railroad was constructed in 1910. Portions of the railroad have been recorded and evaluated elsewhere in San Joaquin County under the designator P-39-000100. The segment that constitutes the project area has not been formally recorded or evaluated... Survey by a qualified archaeological historical resources consultant is recommended prior to railroad and abandonment.

The Office of Historic Preservation agrees with the Central California Information Center's recommendation that a survey by appropriately qualified consultant is appropriate for this undertaking.

If you have additional questions please call me at the number below.

Thank you

Kelly Hobbs
