**Draft Environmental Impact Statement for the Proposed
Canadian National Railway Company Acquisition of the
Elgin, Joliet and Eastern Railway Company
STB Finance Docket No. 35087**

File	082508_Long.wav	Date	08/25/08	Transcribed by	WK
F. Name	Dr. Thomas C.	L. Name	Long		
Title	President	Business	Barrington Countryside Fire Protection District	Dept	
Address	51 W. Mundhank Road				
Address 2					
City	South Barrington	State	IL	Zip	60010

Transcript:

The impact of the increased train traffic through the district with the proposed long freight trains would create a safety hazard for the residents of the district. It is imperative that mitigation be accomplished through moving the current at-grade crossing so that the ambulance and fire equipment could cross either above or below the train traffic, otherwise there's going to be a major loss of life and property. I realize this would be expensive, however sharing of this cost for Barrington among the Canadian National and the regional communities which are affected by this, should allow this to proceed. Again, mitigation of the at-grade crossing creates a serious impediment to the provision of emergency services to the area. Thank you
