Transcript:

I would like to say that the settlement from Canadian National for \$40 Million for the infrastructure is nowhere near enough money. Obviously, even with the impact with the decline of the dollar, it should be adjusted for that issue, and if that is true, there needs to be some kind of settlement from the Federal Government to supplement these costs. I do not live near this area, but I believe that it is a plan that is not financially feasible and certainly in the current economic environment, there needs to be more dollars provided by Canadian National.
