The WATCO & WSOR approval (FD 35848) was based on material omissions that abused a one-week fast track process over the Christmas Holidays. This approval, which should be revoked because critical facts about the seller's criminality using WSOR to launder money specifically to kill high speed passenger rail was never allowed to be part of the public record at STB.

But more important today, GLBT LLC is a partnership and Frank Patton is just the "Managing Partner". Victoria Rutson admits this in here letter dated September 22, 2015, to GLBT's attorneys at Venable.

The other partners are material to docket FD 35952 as Frank Patton has been directly caught in a lie made to initiate Phase 1 approval -- he has no "nondisclosure agreements" with any railroad and he may not have received any indication from any railroad that GLBT that any potential existed to bypass freight currently handled through Chicago.

Since Frank Patton refuses to file an application with STB where he has to certify the representations used to initiate the approval process, he is solely responsible for any and all confusion and concerns about unanswered questions and/or material misrepresentations currently on the docket at 35952

Whether or not WATCO is one of Frank Patton's silent partners and/or financial backers is critical to docket FD 35952. Since Frank Patton refuses to provide certified facts via an application to approve GLBT, it is necessary to determine what, if any, role WATCO has in GLBT.

In order to receive an expedited approval of WATCO's purchase of WSOR over the Christmas Holidays with only a 1-week (obviously inadequate) comment period, WATCO had to represent that it had not plans to connect WSOR with any other rail lines it own. Frank Patton admits that planning of GLBT

began in 2009. If WATCO was involved in any way with moving GLBT forward, then representations made to obtain a Christmas Holiday fast tracked approval are materially false and intentionally so.

I have, for years, been in the process of filing a Petition to Revoke docket 35848 which was active in summer of 2014. At that point, WATCO's law firm sent a slanderous letter to STB that did not challenge any of the documented facts that Bill Gardner (seller of WSOR) was a convicted felon, had used the operations of WSOR to criminally launder more than \$70,000 to elect a Governor that promised to end a federal high speed rail project in Wisconsin.

Unbelievable, and also material to docket 35952, an unindicted co-conspirator, Ken Lucht, Government Communication Officer at WSOR, not only criminally colluded to launder money to stop a federal high speed rail line so that WSOR could have any and all grant money allocated by the State of Wisconsin, but this criminal officially still represents that railroad as their government liason.

Michael Higgins has talked to me about this, however, he continues to misrepresent that my Petition to Revoke ended when I did not provide documentation for a request to waive the \$250 filing fee. If he does not know better, I have given him all information he needs to correct this error -- evidently, he chooses not to.

While I understand there is a "formal" comment procedure and "informal" sections at STB -- each process is compromised and I still cannot get any answers to verify information that is needed to complete a Petition to Revoke docket 35848 and file accurate and meaningful comments to docket FD 35952.

I am requesting that all parties receiving this email cease ignoring material concerns and fact-checking related to the 2 dockets above. I am requesting, for the upteenth time though all sections receiving this email:

1. A direct and accurate statement as to where my filings to revoke docket 35848 are in the process.
2. Strike any and all slanderous comments from WATCO's attorneys which personally attack me instead of refuting the criminality of Bill Gardner and the implications it had on his quick sale of leases that he materially breached.
3. Clear and accurate information as to how I can proceed with the petition to revoke which was all on the record at STB in summer of 2014 and then suddenly disappeared even though I have confirmation that it was received and was placed on the record.
4. Advise on how to present the situation outlined above as a comment to docket 35952 -- Frank Patton is hiding behind silent partners and if WATCO is involved there needs to be an investigation as to whether this indicates that the fast-track Christmas Holiday approval of Docket 35848 was based on material misrepresentations by commission.

Remember, the facts show that there were material misrepresentations of omission -- Bill Gardner illegally use WSOR to launder more than \$70,000 for the express purpose of stopping a federal high speed passenger rail project.
