**Transcript:**

I am calling to state my concern and my wanting to issue a firm hope that they consider the environment of the communities and the areas involved. Not only from an environmental standpoint, but from safety and health and major quality of life issues as well as time, energy, and loss. Especially in a time when transportation costs continue to excel especially with the price of gasoline and other factors. So therefore, I appreciate the understanding and I respectfully submit that you do not approve of this and I appreciate that. Thank you for your time.
