I am sending this email in hopes that you would do the right thing as far as FD35952, the Great Lakes Basin Railroad project. County after County in Illinois and Indiana have opposed this project and for good reason.

All existing Railroads have already stated they would not be using this Railroad. The environmental impact for the wild life and land would be negative. The cost to cleanup spills would be horrendous not only in monetary costs but also ground and air contamination for this and future generations. The farms who generate millions in revenue for our community would be effected. The amount of tax dollars being spent on something not needed nor wanted could be put to much better use.

I appeal to your conscious to realize that "WE THE PEOPLE" do not want this project. Nor is it needed. That "WE THE PEOPLE" who's tax dollars are being considered for this project DO NOT WANT this project. I trust that in the end the Surface Transportation Board will do what is right for the many.

I live directly across the street from where they are proposing to put the Rail Station. As a home owner our property value along with all of our neighbors property values would plunge. This Rail is not needed nor is it wanted.

Thank you,
Nancy J Haas
