

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8-27-28

I find it hard to think of any benefits to the residents of Barington when the CN train rumbles thru. A few Canadian CEOs will get rich, while here:

1. have total gridlock on traffic - N & S, E & W & at an angle on cable 14
2. Our children will be unable to walk to school
3. emergency vehicles will take forever to get to our homes
4. Freight traffic in Chicago will not speed up
5. We - the Barington taxpayers - are expected to handle bill for over a billion dollars at crossing. Excuse me!?
6. I could go on & on about...
