

Surface Transportation Board

I am against the purchase of the E, J, and E railroad by the Canadian National railroad because of the impact the additional train traffic will have on mobility of all kind too move around Lake county in general. I have a service ~~business~~ and have to travel the roads in Lake County and there are many route that have no other alternate route around train tracks that will be used. Traffic is hell now, what else can you do to put me out of business! over
