Dear Board *May 19th JUNE 15*

We had a meeting at Lebanon High School to present our reasons for opposing the railroad. The town at first, was not concerned as the railroad was going "around the town." When the presenter mentioned the railroad will be hazardous material only - the town people became alert! They realized the safety issue of an accident that could affect the water system as the town uses wells to provide for the residents. The track would be very close to those wells! The surface water could be reduced to the wells could become dry!! Please don't build the railroad.

NOTE: When an individual chooses to submit an Environmental Comment or some Other Submission, his or her personal contact information is considered public information and is shared within and outside of STB without additional authorization.
