Transcript:

I'm calling to ask you to please not allow the CN to buy the EJ&E. I think the reasons, there are so many reasons, I think we're mainly concerned with the like safety reasons having to do with ambulances, fire engines, police getting to places that they need to go in a timely fashion. I think there are so many other reasons. The CN does not want to pay almost anything to make it so vehicles can get across or under the railroad, you know the underpasses, and the chemical, you know the chance of chemical spills, accidents, there are just so many reasons, I think that it will make the vitality and what ever other places that it affects make it just, the traffic congestion be almost unbelievable. Okay, well, thank you and again, please do not allow the CN to buy the EJ&E. Thank you again. Bye
