Surface Transportation Board Case AB 167-1189-X and related cases
April 29, 2009

As a participant in activities at Grace Episcopal Church, a few blocks from the Harsimus Branch Embankment, I ask the Surface Transportation Board to use its power to preserve the old rail line for public use, including a greenway and mass transit. Studies have shown the importance of exercise to prevent obesity and related diseases, and to improve mental health. If the Branch is retained for public use, we will have safe walking and bicycling paths near our homes, and can appreciate the birds and butterflies that use the habitat. Many of us depend on mass transit rather than driving; light rail there will give us increased mobility. By my signature below, I ask you not to allow the rail line to pass from your authority without an environmental impact statement. A study will give decision-makers good information about the impacts of rail abandonment.

PLEASE WRITE YOUR INFORMATION CLEARLY.
