Transcript:

My comment is that this is the most ridiculous project that I can imagine due to the negative impact and the safety issues that are in my village and the decrease in home values, which is already taking place due to the other situations. The railroad tracks will split my city in half. It will cause a number of delays in being able to get across town and also delay potential safety of fire and police service from the other side of town if trains are being, running at the time the emergency services are necessary. <Repeated name and address> Thank you
<played music on message for 3 1/2 minutes>
