Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 9.30.08

I do not want the Comandaria National Railway Company to travel thru New Zoned. I moved from a community that had frequent Railroad trains. The inconvenience of waiting for trains is terrible. Property values could drop. The NO156 would be awful. Emergency vehicles would not be able to get thru.

It is not our responsibility to build an overpass. I don't even want an overpass. The expense of one would be unfair to taxpayers.

Please do NOT pass this.

I OPPOSE THIS

The company is not from the U.S.A.

Mayor Daly should have anything to say about the suburbs. The trains on their original routes have been like that for a long time. People bought house knowing of the train problems in that area. I moved here without train problems, so please don't bring them here.

Sincerely,
Kathleen Benzley
