Elizabeth,

Here are three maps of the target areas created by the State DNR RCW biologist, Caroline Causey. These areas appear to have the most suitable habitat. Most other areas seem to be fragmented by agriculture. And yes, we have historical records of RCWs in the area.

Thank you, Paula

Hi Elizabeth,

There are basically two areas where we believe should be surveyed for RCWs due to the habitat. I would like to coordinate this with our SCDNR partners. I will get those to you prior to Tuesday.

Thanks, Paula

Hi Paula. I talked with Mark last week about the Camp Hall Rail project in Berkeley County and he indicated he spoke with you and yall agreed that a 20 mile survey is not needed. He also indicated that you would be identifying any areas where additional survey work should be conducted. While he said that he didn't think you needed the kmz, I actually just converted the shapefile so I thought it wouldn't hurt to provide it to you.

I will be out the rest of this week and will be returning next Tuesday. If you need anything else, please let me know.

Thanks,
Elizabeth Williams
