Transcript:

Yes, I am calling in regards to the CN acquisition to express my concerns and oppositions to the proposed acquisition of the EJ&E Railroad. I'm very concerned about the safety regarding the schools, children, the police, the fire, pedestrians, the traffic congestion and air quality. I'm concerned about the economic impact on changes in shopping patterns, businesses, small businesses in Main Street, and tax revenues that will be lost. The increased fuel consumption regarding the traffic delays, the noise, property value decrease, and then the tax payers, what our liability will be as far as the expenses not being met and also I am very opposed to this acquisition. I've been to several meetings, and hearings and been in touch with Congressmen and this is referring to the Docket No. 35087 and I'm for the bill that needs to be passed as well. So hopefully, this will not, this will not go through. And I beg you, please do not let this go through. Thank you.
