

080218 Priebe

I have the following comment. My name is Bruce Priebe. I live at 415 E Lincoln Ave in Libertyville IL 60048. I'm concerned about the traffic on Route 176 in Round Belt IL. Round Belt has a switching yard back there where many of the trains make up their train schedules and their trains. They switch cars around and put them in proper order for movement out of Libertyville, Lake Forest, Lake Bluff, Round Out area. Many, many times Route 176 is tied up because of the switching of cars around. The Route 176 in the last 10 years has taken on extra traffic. To and from work and a lot of industrial traffic around the Round Out area. Namely Peter Baker and Sons. Many, many times the traffic is tied up from the EJ&E tracks all the way east to Waukegan Road and from the west of the EJ&E tracks all the way to the Illinois toll road. The timing of the switching is quite important because in the morning and evenings there is especially heavy traffic. In the summer time when Peter Baker and Sons is working, there is heavy, heavy truck traffic in and out of his area. Thank you. I'm just concerned about the traffic situation in Round Out IL. Thank you, Bruce Priebe, thank you.
