Transcript:

I am 100% in opposition to this Canadian National Railroad acquisition. I believe that it's impact on our community, dividing our community from hospitals, from expressways, from everything else is going to be so tremendous. I, my husband and I moved from the Midway area airport where we got stuck by traffic, trains on a regular basis. Nothing more scary than to see your child on the opposite side of the train tracks, while you're waiting to pick them up, meeting them from school and it's horrible and I, so I'm definitely against this and I am praying and hoping that this does not go through and if it does go through, because you people decide that it would be beneficial for you, then I believe that we should support the House bill H.R.6707, making them pay for an overpass over the railroad tracks and not us. Thank you. My phone number is 815-722-7792
