I am writing to tell you of my deep disapproval of the CN railroad purchase of the EJ&E railroad. They have no regard for the many suburbans they will be ruining with the increase of freight cars they have planned to travel on the tracks. They also are asking the American taxpayers to front the bill for their infrastructure changes is totally wrong. Why should the American people be forced to pay for a foreign corporation to receive more profits than they already do. I already get stopped by the EJ&E train quite often and I do not want more traffic with the increase of the trains as the CN railroad is proposing. They will divide suburbans in half and cause great traffic, pollution and environmental problems for our areas. Please fight against what the CN is trying to do. Please put people before freight and help the communities effected. Please help us and oppose this purchase by the CN railroad..

Thank you for listening
