

7/3: Dave Nawczyk

Re: proposed R.R. route through Win

I am very much against the route.

It will decrease farm & home values from increased fragmen
Agriculture is a large contributor to our economy. This will take too much highly valuable farmland out of production.

Filling in wetlands greatly affects surface and groundwater quality. Wildlife have increasingly less habitat.

How many overpasses will be built? maybe very few. Thousands of people commute to Rockford every week.
