Transcript:

I have to pass 2 tracks in order to get into town where I work. Already when the traffic is backed up its almost impossible it's a very long wait when you have a very large freight train gowing by because we also have the commuter trains going by regularly. And so I am hoping that you will take all of this into consideration very seroiusly I know that this is probably on your impact study but this is it would absolutely ruin this whole town it would ruin the downtown area the shopkeepers for people to be able to get in there um its an impossible situation with so many tracks criss-crossing the entire area around they go right through the town. So I would highly recommend that you not let this go forward and not let them try and go through this not to avoid the study and to rush through the purchase until all of the imformation and the facts are in and make sure that its well looked at and digested and not let the railroad company get in ahead of time before all of this is done thoroughly. So I thank you very much, if you want to get back my phone number is 847-277-0449 thanks so much for your very kind attention.
