2011 PMRE Final report-01262012-nofigures_AKSHPO021312.docx

Hi Catherine,

I've attached a document that provides you with both the comments we provided during our preliminary review of the first draft of the report, as well as some additional concerns that we have on this version. Also attached are some tracked in-text comments/changes in the report.

Regarding the documented site within the vicinity of the Haul Road, we agree with your concern and would prefer that the Haul Road not be removed from the APE.

Once you've had a chance to review the attached comments, let me know a time that would be convenient for you to discuss. I can make almost anytime work tomorrow.

Thanks again – best regards,
Shina

Shina,

I'll be in on Tuesday and will be starting at 6am EST. I will need to talk with Vicki Rutson as well about all of this. Maybe we can schedule a time on Tuesday where we can all talk (Vicki, you and me). It will likely be later in the day EST. Let me know if you have a couple of times that day that work for you. I will send ARRC my more detailed, marked up comments in the morning, but I am quite concerned about ARRC now saying they want to remove the Haul Road from the APE.

 Subject: RE: PMRE 2011 Archaeological Survey Report

Barb,

On Tuesday, I am currently scheduled to participate in inter-agency meetings on a very large project that we're currently working on, which are to be held from 8:30-3pm. I have contacted one of the meeting organizers to get an agenda so that I can know when they will be discussing Section 106/AHPA and cultural resources so that I don't have to attend the entire day's meetings. I have not yet heard back from her. As such, I still have 8:30-3pm blocked off on my calendar for Tuesday.

Additionally, I believe it would be appropriate for our office to discuss specific comments directly with STB prior to meeting as a group, so I'll need to find time to fit that in earlier on Tuesday as well (of course accommodating Catherine's schedule with the understanding that she is on EST).

I believe that I can make Tuesday work, but I cannot say exactly when until I've heard back from Catherine on her availability in the morning and from the other project's meeting organizers on the all day inter-agency meetings scheduled for Tuesday. I apologize for any inconvenience that this may cause. I hope to know by end of day today or on Monday. I will be sure to keep you apprised on my schedule openings as soon as I

know.

Best regards,
Shina

Subject: Re: PMRE 2011 Archaeological Survey Report

Cathy and Shina,

We are looking forward to working with you on the draft 2011 Survey Report. We think it would be beneficial to have a call to discuss your thoughts early next week. We are pleased to take on the responsibility to revise the report and plan to begin some initial edits right away. We would appreciate your thoughts on the following approach.

Proposed Approach – ARRC, with assistance from HDR, will:

1. Review and edit the report to correct grammatical errors and improve overall organization and readability
2. Remove information regarding the Haul Road survey and discovery of the possible cultural feature from the report. The report will only include discussion of the surveys for Segment 1 and the Section 6 Borrow Area and recommendations for no additional surveys in Segment 6 (due to previous surveys and heavily disturbed area/existing ROW). This approach is consistent with the Working Group MOU, which acknowledges in Section 5(K)(1) that reports may be submitted as surveys for each project segment/component are completed. Our ongoing consultation with SHPO as we were preparing the draft report did not lead us to believe that keeping the information on the access road and findings in the report would be a concern since the Haul Road survey is not part of the APE, but since it seems to be creating problems, we will remove it.
3. Address any additional comments provided by STB and SHPO on the draft report submitted on January 26, 2012
4. Submit the final report (covering survey results for Segment 1 and the Section 6 Borrow Area) in accordance with the PA and MOU, with a revised cover letter seeking approval to proceed with construction in Segment 1, the Section 6 Borrow Area, and Segment 6.
5. Notify contractors that they cannot under any circumstances, use the proposed Haul Road until additional surveys, as necessary, are conducted and necessary approvals are obtained. If you would like, we will submit a revised APE drawing showing this area is excluded from the APE.
5. Prepare a separate report addressing the Haul Road, and submit it in draft form for your review. We may need further consultation with you on this item, as the access road is no longer part of the APE, and may never be part of the APE, so it is unclear if additional surveys are needed or if a DOE is needed. The possible cultural feature has been reported to the Office of History and Archaeology for inclusion in their statewide database. Typically DOE's are only needed for resources identified in the APE. As Shina may have mentioned, sufficient information regarding the possible cultural feature is not available at this time to make recommendation of National Register eligibility. Additional information would need to be obtained in the spring after the snow melts. If there are future plans to construct the proposed Haul Road, we may try to realign the road to avoid the possible cultural feature.

I know you are both very busy, but please try to find the time for a brief conference call. Shina – is there any chance you can fit it in your schedule on Tuesday? Please let me know your availability ASAP. Thanks, Barb.

Barbara,

I will be out of the office until Tuesday of next week. However, if you want to start editing the document pursuant to my comments to date, please feel free to do so. Many of the grammatical and format issues could be done quickly. You can also make the document more fluid and easier to follow and make certain that it meets the SOI and AK SHPO standards. Both can be downloaded. I would also address the issue regarding the National Register eligibility of the site on the Haul Road. Please provide updated eligibility recommendations. If not, we will work directly with the SHPO to sort this out.

I will be discussing the entire report issue with Victoria Rutson, Director of the Office of Environmental Analysis, next week. She is already aware of the report's deficiencies as I have discussed in past emails to you.

All the best,
Cathy

Catherine and Shina - I would like to have a brief conference call with both of you and Elizabeth ASAP if possible, so we can make some progress on revisions this afternoon. We have had previous discussion with SHPO on some the items in your e-mail. Please let me know your availability. We can use the ARRC bridge line (907-265-2252). Thanks, Barb

>>> <Catherine.Glidden@stb.dot.gov> 2/10/2012 10:30 AM >>>

Barbara,

I did get your voice mails, but need to head out of the office in a few minutes, so I thought I'd respond via email.

I will be providing some general comments to you early next week regarding some examples of problems I see with the report. I will also mark up a few pages with specific comments. I have been advised by members of my staff to request that you make the changes on your end and then provide the SHPO and STB with revised DRAFT documents for another round of reviews. In the meantime, I would suggest that you work with the SHPO to determine the likely eligibility of the site that was discovered along the Haul Road. This should be done since the area was surveyed and described in the report. The fact that "there is a strong

possibility that the proposed Haul Road will not be constructed" does not justify skipping this step, especially since Site TYO-00276 appears to be the only significant site identified during the entire survey. What if the Haul Road IS constructed and the site is destroyed?

I would also have members of your staff begin an editorial overhaul of the report. There are multiple grammatical errors in the report that can be addressed right away. I would also be certain that the organization of the report is improved. For instance, the discussion of the probability areas and how they were derived needs to be more clearly discussed (discussion on pages 3 and the bottom of page 4 should be combined).

I understand that you have a tight schedule, but we will need to ensure that we only approve documents that meet the SOI and AK SHPO standards agreed to by all in the project MOU.
