Transcript:

We do not support the purchase of the EJ&E Railway by CN. We oppose the proposed acquisition for the following reasons, increased train traffic, there'd be increase in noise, vibration, and pollution as the trains pass through our community, traffic congestion, our roads are already congested without adding vehicle delays at train crossings, there are many at-grade rail crossings in our area, and safety concerns, the emergency response times, and the transportation of hazardous materials through our area. We say no to the purchase of EJ&E by CN. Our community and our neighboring communities should not have to suffer from the negative impact that this potential sale would have on our area.
