Dear Sirs:

Re: U.S Surface Transportation

I just wanted to say this is a bad deal for the community of New Lenox, IL.
I don't understand why you don't leave the rail road in the City of Chicago It works there. It has for Years.

Reason is you have bridges that cars can go over and the rail road Cars can go under
Traffic and Emergency Vehicles can get around other Streets.

Here in New Lenox there are 5 crossing and More than one can be blocked at one time.
And do you know what that would do to this Area, Stop Emergency Vehicles and causing
traffic and Congestion. If you worked and lived here you would understand the
concern's there is no way around these Rail road Crossing.

No bridges to go over or under for Emergency Vehicles & Cars, School Bus etc. and this
is just wrong.

(STB) Environmental Impact on CJ&E Railway Purchase is just not good for this
community. Leave it where it's at.

Sincerely,
Mr. & Mrs. Karen Grabinski
120 Gall Lane
New Lenox, IL 60451
