Transcript:

I am 100% opposed to CN taking over the EJ&E rail lines it will create a huge delay for the school buses and emergency vehicles. There are a lot of schools on this line and it would be horrible to try to get those kids across and to school with so many trains going. Not to mention the noise and vibration of the surrounding neighborhoods getting it, an increased risk of train accidents, the air pollution and emissions alone form all the idling cars waiting and sing up more energy such as gas to fuel these cars. There'll be more personal danger to everybody trying to use these. There will be loss of jobs in the US to Canada. They're an unsafe railroad and they need to go to CREATE because there's no reason why they should shift one burden from one community to another community like that when CREATE is there to solve the situation. As far as mediation goes, I believe they should pay for that, there is no money in the tax system that us taxpayers should upgrade their system because we do need over or under passes. Thank you. Bye
