Transcript:

I know we're coming down to the last moments of you guys taking comments, if you guys can go to stopcnrail.com, this is a website that we have put together in our community to hopefully try and pursue more people to be more aware of what's going on. A lot of people don't understand or don't realize what's going on and we're trying to spread the word as much as we can to stop this acquisition. If you go on the website and check out the pictures or videos of train explosions, you will see that one particular one, a part of a train car explodes and travels through the air almost a mile and it lands in a farmer's field. With the population that we have in this area, 3/4 of a mile or more if that part could land in somebody's house, in our school with 300 kids. Picture my house on fire and nothing I can do, but there's something you guys can do, you guys can stop this acquisition, you need to stop this acquisition. It's more than just explosions, it's congestions, traffic congestion. It's a very nice area, we'd like to keep it that way. Thank you
