Transcript:

Reference to STB Finance Docket No. 35087. I believe this would be a catastrophe for the area. 1) Road Traffic, 2) Water Levels, 3) Traffic Flow, a) extensive railroad traffic, b). It is going to divide numerous communities, c) There is no provision there for the Canadian National to upgrade the facilities or to make the facilities safe for the residents. I can't understand why or how this government in the financial position it is in will undertake to take to do those things that are required and subsidize a Canadian firm on these economic conditions. The air pollution and the noise pollution is just going to be astronomical. Let me hit pound at the end of my comments. If you could, you could give me a call back at 847-526-7266. Thank you.
