

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 27 Aug '08

I live in Lake Zurich, IL. My community will be substantially harmed by the proposed CN acquisition of the EJE line.

In particular, I live near the current grade crossing at Ela Road. Increases in both the number and the length of the trains will substantially ~~be~~ increase congestion at that crossing. Our community is already a traffic bottle-neck; this will only make it worse.

As a minimum, CN must be made to pay the mitigation costs. I support free enterprise, but local citizens should not be forced to, in effect, subsidize the profits of the company that will benefit from the acquisition.

Please do not foist this onto the taxpayers of Lake Zurich.
