Transcript:

I am calling in regards to Finance Docket number 35087 and I wanted you to know that I am opposed to the CNN purchase of the E&J, the EJ&E Railroad. It's already, from reviewing the traffic delays at the railroad crossings and also I'm concerned about the safety of the crossings and just, I already commute towards the city, toward Brookfield, Illinois and I've already been caught numerous times in Plainfield with long delays at the trains crossing there on Route 126 and I just see this increase of 16 days to 42 trains per day, averaging up to 10,000 feet in length. I just think this is ridiculous, that's almost two miles, that could just, the delays on the roads are already bad enough and we just don't need the, and the noise. If they could suggest an alternative that would be great. Okay, thank you
