Dear Mrs. Johnson-Ball,
Please do not get CN

railroad buy ETC railway.
It would be terrible for our town.
You could be 30 towns away
that could extend 3 miles long!

My little nephew has diabetes
and if he had to get to the hospital
it possible the ambulance wouldn't
get him there in time because of the
fire train. He could go into a coma
and die! If people meet the police
and firemen they would have to
wait while something terrible is
happening! I also know that
CN will transport dangerous hazardous
materials through our town. If a garden
there is an accident what would
happen to the people that live here?
Am really afraid for my family
and our town! Can you please
tell them they can't buy ETC
railway or people are in danger
here. Thank you very much!
