Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

STB Finance Docket No. 35087

Date: Aug 27, 2008

Comments must be submitted by September 30, 2008.

I live in Lake Zurich, IL, a town that will be adversely affected by the proposed acquisition of the ESE line by CN.

Unless there is substantial mitigation provided, it will decrease the appeal of Lake Zurich as a place to live. This will reduce property values, which will, in turn, reduce the tax revenues which support our schools. The current proposal by CN is not adequate.

It is senseless to pass the mitigation costs onto the local citizens. If CN will make profit from the ~~changes~~ acquisition then let them pay the costs of improving the grade-crossings.
